PROFESSIONAL SUMMARY

Computer Science undergraduate with strong expertise in Python, web development, and SQL, with hands-on experience in machine learning and IoT-based systems. Developed scalable projects including AI-powered monitoring solutions and web applications. Completed international industrial training at Universiti Malaysia Perlis and a prestigious internship with the Directorate General of Civil Aviation (DGCA), Government of India. Seeking entry-level Software/IT roles to apply technical skills and contribute to innovative solutions.

EDUCATION

B.Tech in Computer Science & Engineering | Vel Tech University
Chennai, India • 2022 – 2026
CGPA: 8.4 / 10

Intermediate (MPC) | Sasi Junior College
Palakollu, Andhra Pradesh • 2020 – 2022
CGPA: 8.8 / 10

INTERNSHIP EXPERIENCE

Intern – Directorate of Training and Licensing | Directorate General of Civil Aviation (DGCA), Govt. of India
New Delhi, India • Apr 2026 – Present

- Worked within the Directorate of Training and Licensing, supporting regulatory and documentation processes related to civil aviation training standards.
- Assisted in data management, documentation review, and processing of licensing-related records for aviation personnel.
- Gained exposure to government regulatory frameworks, compliance procedures, and aviation safety policies.
- Collaborated with officials to streamline technical documentation and data-handling workflows.

Industrial Trainee – Intelligent Computing | Universiti Malaysia Perlis (UniMAP)
Malaysia • Oct 2025 – Feb 2026

- Selected for an international industrial training program under the Centre for Industrial and Governmental Collaboration (CIGC) PPRN grant (9024-00013).
- Worked in a research-intensive computing environment within the Faculty of Intelligent Computing.
- Assisted in Python-based data handling, technical documentation, and academic computing tasks.
- Collaborated with faculty and peers in a multicultural, international professional setting.

PROJECTS

Plant Disease Detection (Machine Learning)

- Developed a CNN-based system for early and accurate plant disease detection.
- Preprocessed leaf image datasets and trained models using TensorFlow/Keras.
- Achieved high accuracy in disease classification and enabled real-time analysis.

AI-Assisted IoT Water Quality Monitoring System for Aquaculture

- Built an end-to-end IoT + AI system using ESP32, multi-sensor data acquisition, and cloud-based analytics.
- Developed rule-based AI model for multi-parameter risk scoring (temperature, pH, TDS, DO) with automated decision support.
- Engineered real-time data pipeline using Google Apps Script APIs and cloud storage (Google Sheets).
- Created responsive dashboard with Chart.js for live monitoring and trend analysis.
- Delivered multi-channel alert system (Gmail, WhatsApp) with threshold-based triggers.

Learning Content Assistant for Students

- Developed a platform providing video-based explanations for complex academic topics.
- Implemented a query submission system allowing students to receive answers via email.
- Improved learning accessibility through structured content organization.

TECHNICAL SKILLS

Programming: Python, C (Basic)
Web: HTML, CSS, JavaScript
Databases: SQL
Tools & Libraries: Git (Basic), NumPy, Pandas, Matplotlib, TensorFlow/Keras

CERTIFICATIONS

- CODEVOLT 25 – Raptee.HV, VIT Chennai
- Machine Learning using Python – Infosys

ADDITIONAL INFORMATION

Strong communication, teamwork, and adaptability skills. Experienced in international and government professional environments.
